

Calling for Participants in the Remote Community Garden Plot Program!

- Have the connection of a community garden but with a plot steps from your home!
- Help promote food security in our city!
- Learn to grow your own food!

You are invited to buy a plot from the ESG Community Garden for \$175, and we will deliver it to your home, fill it with soil, and provide a selection of seedlings.

- You will receive a raised cedar bed of 2x4 ft, although different sizes can be accommodated depending on space.
- We'll install the plot and prepare it for you, all you have to do is plant in it and maintain your garden!
- Plot includes a sign that states: This garden is a part of esgunity.org/communitygarden

Ask questions, receive advice, and participate in gardening workshops.

- You will have access to expertise from Sofia Finley, ESG's Community Garden Coordinator, who holds a degree in plant science. She will email you weekly advice for how to maintain your garden, and will be available for any questions you may have!
- Connect with ESG's community of gardeners, including gardener's gatherings and bi-weekly gardening workshops beginning in June.

Connect with your neighbours and promote food security in Toronto.

- You will also be invited to give 25% of your harvest to an individual or a group who is experiencing food insecurity. For example, you could commit to donating some of your harvest or prepared food to ESG's Little Free Pantry, your local food bank, or a neighbour in need.
- Love this idea but can't do it this summer? Buy a plot as a direct or anonymous gift for someone else! :)
